

# KS1 Folding Food Chain Activity

**Activity:** Choose 4 pictures and cut them out, then glue the pictures onto a template in the correct order to create a folding food chain. Think about whether it is a producer, prey or a predator. Is there more than one predator in your food chain? Think about which one would be top of the food chain. Label each picture whether it is the **producer**, **prey** or **predator** and write down a short description their role in the food chain. Fold along the dotted lines so that the producer is on the front of your booklet.
