

Can you research using the internet or non-fiction books to find out where each of the species are found in the wild? Print this page in A3 size and draw a line from the animal's picture to the correct area on the map. Find out what their current conservation status is (Vulnerable/Endangered/Critically Endangered etc.)

Extension activity: Research the main threats to the animal in the wild and make a poster to put up around school to help others learn about endangered species and what we could do to help.

Linne's Two Toed Sloth
Conservation Status:

Humboldt Penguin
Conservation Status:

White Rhino
Conservation Status:

Asiatic Lion
Conservation Status:
