

Indoor Den Building

Building a den out of branches in the woods can be great fun, but we can also build them indoors and it can be used for all sorts of activities once built. We decorated our den with some battery powered fairy lights.

You will need

- Something sturdy to build the den with – a table, chairs, clothes airers are all great
- Blankets, sheets, cushions to put inside and over the top of your structure
- Pegs
- Fairy lights

1. Use the table and chairs to create an outer structure with some space underneath.

2. Fill the space underneath your structure with cushions and blankets to make a nice comfortable area.

3. Drape sheets, blankets, duvet covers over the top of the structure to make a nice secret space. You can use pegs to clip blankets together and hold them in place.

Top Tips

If you have a spare bed, you can build your den over the top to create a really cosy space.

Enjoy your cosy den for indoor picnics, playing with toys, story time or just relaxing.

You can hang up lights and any other décor of your choice to make your den really inviting.

Pet friends optional!
